

WHEATEN LUCERNE BLEND

Steam Cut & Dust Free

Our Premium Wheaten Lucerne Blend is a highly palatable feed delivering quality fibre with higher protein—ideal for horses and ponies in work.

Made from a blend of premium wheaten and lucerne hay, steam cut to an ideal fibre length, triple sieved and dust extracted, our chaff offers consistent quality, high palatability and made to support both digestive and respiratory health.

- **Highly Palatable**
- **Supports Healthy Digestion**
- **Balanced Protein & Controlled Energy**
- **Slows Feed Intake**

WHEATEN LUCERNE BLEND

Steam Cut & Dust Free

HIGH PALATABILITY

Highly palatable, soft texture encourages feed utilisation.

CONDITIONING

Higher fibre and protein provides balanced nutrition for healthy digestion and overall condition.

HIGH FIBRE

High fibre supports hindgut function and encourages natural chewing and saliva production for easy digestion.

CONTROLLED ENERGY

Provides controlled energy for sustained performance.

Suitable For

- Horses and ponies in light to moderate work needing higher protein
- Pony breeds prone to weight gain
- Owners and trainers looking for a reliable, high quality forage
- Chop length is easy to chew for horses with worn or damaged teeth
- Ideal base for mixing with grains or supplements in feed rations

Feeding Recommendations

- Always feed by weight not volume
- Introduce any new feeds into your horse's diet gradually over a 1-2 week period
- Horses require a minimum of 1.5% of body weight (kg) of forage per day
- For example, a 300kg pony will require at least 4.5kg of forage daily or 500kg horse will require 7.5kg of forage daily
- Forage requirements depend on pasture availability, horse's weight, age, size, condition and work level
- Consult a qualified nutritionist for a complete feeding plan to suit your horse's individual requirements
- Ensure your horse always has access to clean drinking water

Storage Advice

- Chaff is a natural product and must be stored in a cool and dry area out of direct sunlight. Once opened store in a secured feed bin. Our chaff is best used within 12 months from production date.
